Digital transformation

The digital transformation of small businesses is becoming a major challenge for the French economy.
As part of the autumn 2020 stimulus plan, the Government has already set up the "plateforme France Num" to encourage businesses to transform themselves and support them in their efforts.
In our digital environment, companies that are not digital are less efficient; then, they will soon be overtaken by those that have modernized.

As true partner in success, Quovive advises and supports you in every step.
Ask for our expertise, gain in serenity and time.

What is it all about?

Improve your administrative, commercial and HR organization
- Automation of manual processes
- Ranking optimization
- Better accessibility and sharing of documents

Guarantee the security of your data
- Structuring confidentiality
- Backups
- Cybersecurity

Be in compliance with current or future regulations
- RGPD
- Electronic invoicing mandatory from 2023-25
- Digital safe
- *Etc.*

Make you known and control your e-reputation

How to get it?

As your chartered accountant, we already know your administrative organization well. And because we have modernized Quovive, we know what we're talking about when it comes to the digital transformation of a small business.

Thus, we are competent to help you in 3 steps:
- Diagnosis of the existing
- Target recommendations
- Support in the implementation of your new organization

Our approach is simple and adapted to the size of your company. Our fee packages are all-inclusive.
We work with IT partners who offer stabilized and efficient solutions that we know well.
